Part 2

1. The POST request accepts bodies and expects text information to be sent.
2. The GET request returns an array of all the posts on the API.
3. https://practiceapi.devmountain.com/api/posts/555
4. Responses:
   a. 200:

      description: Returns an array of filtered posts

      schema:

        $ref: '#/definitions/ApiReturn'

   b. 409:

      description: Request query is missing required text property.

5. https://practiceapi.devmountain.com/api/posts/

        body: {

          "text": "Joy"

        }

6. https://practiceapi.devmountain.com/api/posts?id=1414

        body: {

          "text": "LOVE ME SOME GREEN"

        }

7. https://practiceapi.devmountain.com/api/posts/filter?text=blue
8. application/json; charset=utf-8
9. 409: description: Request was missing req.query.id or req.body.text
10. The API returns all the posts. Query strings are ignored because it is set up to show all the posts. This GET request does not accept queries.
